

INNDESIGN INC: Where Custom Meets Creative

By Kacey C. Krznaric

INNDESIGN is a state-of-the-art innovative kitchen and bath design and remodeling company, specializing in home storage and space planning. In addition to INNDESIGN's accredited team of professionals that share 100 years of combined experience in the industry and a refined eye for detail, their focused and client-centered approach is what sets them apart in the business.

Since its conception in 1988, INNDESIGN has seen many changes in over 2 decades. From its humble roots of cabinet and countertop design, the company has expanded its vision to later develop into a hub for complete design and remodeling. Owner and creative designer, Vesta Snell, currently employs a specialized team of highly qualified individuals aside from herself that are responsible for the day-to-day progression and continued success of this family-born business. INNDESIGN is committed to working side by side with their clients and using their talents and abilities to bring the client's vision to fruition.

A service-first, design-strong, and highly experienced team of professionals will work with a client from the initial planning phase of the project to the final, finishing touches of a guaranteed high quality product. The team is dedicated to approach each individual job with an enthusiasm and professionalism from start to finish, ensuring a smooth transition from vision to creation of what could be an otherwise challenging- and often times frustrating- endeavor for an individual to do on their own.

Vesta and the team at INNDESIGN encourage you to visit their showroom in Sarasota to see their exquisite custom cabinetry and furniture and both artistic and functional designs and remodels. At INNDESIGN, client satisfaction is their number 1 priority. You are sure to get a high-quality product delivered with a beautiful aesthetic and the team will work diligently to exceed your expectations.
