

BAGNI DI LUCCA ART FESTIVAL

by Assoc. il Ponte in Arte

The Bagni di Lucca Art Festival in Ponte a Serraglio, Italy is born for the love of art.

It creates a haven for artists to fully express themselves through the making, exhibiting or performing of their work to the enrichment of the local community and a wider audience. A revival of the former glory of Bagni di Lucca featured Pavel Kapic and Alyssia Lazin, seasonal Sarasota residents.

Kapic and Lazin, husband and wife, combined their art as a painter and a photographer to create a body of work titled Confluence. The work embodies an interdisciplinary approach that shifts the traditional boundaries. Lazin's photographs, printed on watercolor paper, are the inspiration and the initial imagery for Kapic's mixed media painting. The result is Confluence - converging, meeting, flowing together.
