Named after the 4,200 foot mountain rock, Rocque Bentayga, in Spain's Grand Canary Island, Bentley has launched an incredibly rapid (0-60 mph in 4 seconds, top speed of 187 mph), all new powerful (W12 engine producing 600 hp/664 lb ft torque), and ground breaking luxury sport utility vehicle that will be truly bespoke for the new owner. It will provide an astonishing experience in not only its ride and handling but by its limitless capabilities to traverse through ice, snow, sand, mud, gravel and off road trails. Drive Dynamics Mode offers the smoothest of rides, over the toughest of environments, with absolute confidence and total control.

Bentayga is the most technologically advanced Bentley ever produced. With more than ten new Driver Assistance systems it will make driving anywhere under any conditions pleasurable and enhanced with intelligent functionality. Using heads up display, night vision, blind spot assist to name a few, will make any journey nearly effortless. Since the launch of the Continental GT over a decade ago, Bentley has been setting new standards in luxury all-wheel drive technology. The result of the new technology integrated in the Bentayga, launches one with total confidence into any on-road or off-road condition.

Every Bentayga will be as unique as its owner, from the seven different wheel designs, 15 different soft leather hide options, seven natural veneers, almost every visible feature of your Bentayga can be customized to your own specification. If your desires require even more creative and unique specifications, the Mulliner team at the factory will create completely bespoke modification to meet your requirements.

We at the Dimmitt Automotive Group will have the first 2017 Bentley Bentayga on display at our new Sarasota Studio at 1518 State Street in downtown Sarasota on Saturday, November 7th. Please contact me at (813) 785-4380 or fkrasne@dimmitt.com if you have any questions regarding this exciting and unique Bentley, or would like to attend the event.
